

# Apply Your Skills and Advance Chiropractic!

Education — Research — Advocacy

## Council on Applied Chiropractic Sciences

*Professional Development for the Doctor of Chiropractic and the Chiropractic Profession*

The Applied Chiropractic Sciences Council is an international specialty council committed to enhancing clinical excellence, cultivating educational growth, and expanding communication, information and networking resources to better serve and enrich the capability of the doctor of chiropractic and the capacity of the profession to provide optimal care to patients of all ages, everywhere in the world.

### *A Community of Education and Advocacy for Chiropractors and Chiropractic:*

The Council promotes advancement of clinical knowledge and case management through programs, resources, research and protocols, and credentialing systems. We serve as credentialing body for the Chiropractic Certification in Spinal Trauma (CCST), the Diplomate in Applied Chiropractic Sciences (DACs), and the Council Consortium for Imaging and Thermography credentials, and also present and sponsor programs in clinical science and technique.

- ✓ **Referral Service** with regional, alphabetical and Council credential-linked listings in the **International ICA Science Council Specialty Referral Directory** highlighting contact and referral information for Applied Sciences Council Members, and with special entries for Council doctors holding current CCST and DACs credentials
- ✓ **Discounted registration fees** for Council programs, seminars, conferences and partnering-sponsor events
- ✓ **Special discounts** on ICA products and publications, plus **discounts** on products & services with CACS

- ✓ **Periodic publications** and special informative news notices that keep you current and informed
- ✓ **Ongoing education and support** to develop a leadership role in your community and promote awareness about chiropractic care
- ✓ **Assistance with reference/resource** information related to chiropractic efficacy, safety, & relevance for your practice

**Overview of COST EFFECTIVENESS and EFFICACY Associated With Chiropractic Care**

Highlights from a Research Reference Review prepared by the International Chiropractic Association - Council on Applied Chiropractic Sciences

**THE CHIROPRACTIC PROFESSION HOLDS A UNIQUE ABILITY TO SUBSTANTIALLY REDUCE THE COSTS OF HEALTH CARE.**

As primary care providers, chiropractors are in a unique position to reduce the costs of health care through their focus on prevention and the use of non-pharmaceutical, non-surgical, and non-invasive treatments. This is especially true for the most costly and often avoidable health care services: hospitalization, surgery, and long-term care.

Research in a growing assessment of health care studies demonstrates that when the percentage of chiropractic care of health care costs is reduced, the overall cost of health care is reduced. This is especially true for the most costly and often avoidable health care services: hospitalization, surgery, and long-term care.

Backbone for the chiropractic profession and credentialing in our national multilateral system.
